💼 Professional Experience

Founding Engineer
Jun 2025 - Present (TypeScript/Python Stack)

- Created architecture and implementation of:
  - Chrome extension and server for parsing page content and subsequent analysis of the gathered information.
  - Mobile app and server with real time collaboration for a small user group.
  - Plugin for an open source C# application
- Skills used: monorepo, TypeScript, Python3, C#, Node.js, React, Nest.js, Next.js, Socket.io, PostgreSQL, Prisma, Docker, Prometheus+Loki+Grafana, Manifest V3, VPS (Linux)

AstrumU (Startup) — Backend Engineer (TypeScript/Python Stack)
Apr 2022 – Jun 2025

- Participated in development and maintenance of:
  - PDF Cleaning and Parsing
  - Client-facing API
  - Data pipeline
  - White-label system
  - Skill analysis system
- Skills used: TypeScript, Python3, Node.js, FastAPI, Ray, React.js, Nest.js, Pulumi, MongoDB, PostgreSQL, TypeORM, SQLAlchemy, Auth0, Kafka, Dagster, Tilt, Dagger, Redis, Docker, Kubernetes, Azure Cloud

Full Stack Engineer (JavaScript/PHP Stack)
2018 – Feb 2022

- Independently worked on existing codebases, implementing features, debugging issues, and learning new frameworks on the fly to meet client needs.
- Contributed to the architecture and initial implementation of a white-label learning platform.
- Implemented and managed an e-commerce platform for seasonal product sales, contributing to both engineering and direct sales operations.
- Developed multiple Android applications, including a language learning app (memorizing irregular verbs), a plant care tracking tool, and a logging app for paramedics used to record actions and used materials.
- Skills used: JavaScript, TypeScript, PHP, MySQL/MariaDB, Node.js, Firebase, Laravel, Ionic Framework, Angular, Java (Android), Wordpress, HTML5, CSS3, VPS (Linux)

Founding Engineer (JavaScript/PHP Stack)
2012 – 2018

- Worked on an early-stage on-demand service marketplace, focusing on core platform design and user flows for connecting clients with technicians.
- Developed high-conversion landing pages supporting paid campaigns on Google Ads.
- Developed a field service management platform for handling job assignments, inventory, and customer communication.
- Skills used: JavaScript, PHP, MySQL, HTML, CSS, VPS (Linux)

🎓 Education

STEP Computer Academy, Dnipro, Software Development, 2012
